Pratik Kumar

Full Stack Developer

Pratik-Kumar-621 | pratikkumar21 | pratikkr621@gmail.com | +91-9031942176

SKILLS

• HTML • CSS • SCSS • Javascript • Typescript • React.js • React Native • Next.js • Node.js • Express.js • MongoDB • Prisma • Tailwind CSS •ShadCN, MUI and AntDesign • Git • Github • Figma

EDUCATION

IIIT KURNOOL
B.Tech in Computer Science
2019 - 2023

EXPERIENCE

TATA CONSULTANCY SERVICES | Frontend Engineer
Sept 2023 – Current | Chennai, India

➔ Designed and developed the UI of a chat agent that will provide details about the alerts and reply to your queries. In the chatbot, there is also a dashboard where you can visualize the data as a table. On top of that, there are graphs relating the alert's age, and counts of alerts per VM to get more clarity about the data. The technology used are React.js, Typescript, and Redux.

➔ I am an SME for the React.js training program where I am training the associates in frontend technologies like HTML, CSS, Javascript, React.js and Next.js

➔ Currently part of the HR Tech team, responsible for maintaining and enhancing the UI of career portals to ensure a seamless user experience. Develop new features, optimize front-end performance, and integrate with APIs like Mulesoft and SuccessFactors to streamline data exchange and improve functionality.

➔ Tech Stack: HTML, CSS, Javascript, Typescript, React.js, Next.js, React Native and Node.js.

DATACHECKS | Frontend Developer Intern
April 2022 – October 2023 | Remote

➔ Part of the early engineering team, contributing to the core development of the product.

➔ Developed multiple reusable components like dynamic graphs, multi-step form handler, paginated tables, dashboard sidenav etc.

➔ Optimized API Integration by efficiently managing responses based on status codes and handling the errors to ensure seamless data flow. Also developed reusable utilities for API requests, improving maintainability and reducing code redundancy.

➔ Tech Stack: React.js, Typescript, CSS, Redux & MUI.

PROJECTS

AUTOTREND.AI Repo Link | Visit Live

➔ Autotrend.ai is a platform where you can create AI generated social media post on trending topics in just 3-4 clicks and also save the posts you like.

➔ Workflow: At first you need to search a keyword or select a keyword from the suggestions. Based on your selected keyword AI will generate 10-12 prompts for you to generate the image and description of the post. Select the one you like and the AI will create a post for you. Save it if you like.

➔ Used Google Generate AI API for generating suggestions, prompts and descriptions and used FLUX API for image generation. For authentication, I used Firebase. There is also a dashboard where you can keep track of the saved posts.

➔ Tech Stack: React.js, Next.js, Typescript, Scss, Prisma and Firebase.

OPEN SOURCE CONTRIBUTIONS

1. [BUG] While selecting the Cal.com is better with teams it is not behaving appropriately. #12575

2. Signup options are not disabled after clicking on signup button and some other minor issues #12586
